

RunE2E Advisory Services for SAP

Independent Advice. Measurable Results.

It's a time of transformation for the traditional IT organization. Today's technology leaders must deliver revenue-driving solutions faster, but without adding additional resources. Budget pressures mean a focus on cost reduction, but without sacrificing scalability and security.

RunE2E Advisory Services for SAP can help you do more with less. We offer focused expertise to help your IT organization increase its efficiency and value—not its budget.

NOT YOUR TYPICAL CONSULTANTS

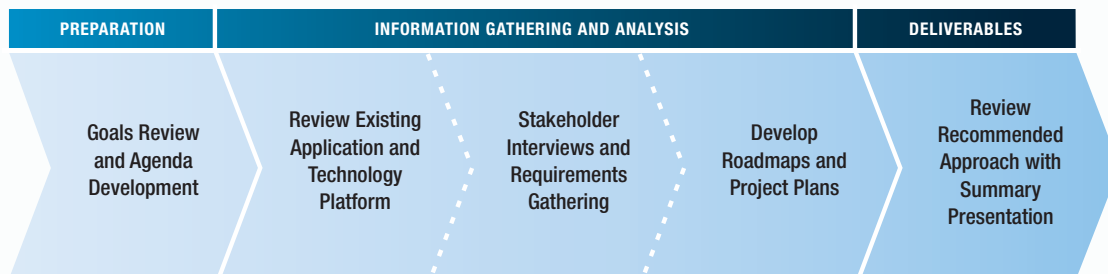

Traditional consulting carries a lot of baggage. High-costs, lengthy engagements, and scope creep are common pain points.

RunE2E Advisory Services are different. Our fixed-cost engagements focus on rapid identification of your needs and actionable project plans with defined timelines and deliverables.

As a client, you work directly with one of our expert Senior Advisors—not an unwieldy team of consultants. We also provide an executive cost and ROI analysis to help you understand and justify your spending using conservative industry metrics and benchmarks.

ADVISORY SERVICES FOR SAP

- Solution Usability Roadmaps
 - Cloud
 - Mobility & iPad
 - Analytics
 - CRM
 - SRM
 - HCM
- Software Selection
- System Integrator Selection
- Resource Optimization
- Project Plan and Team Definition

A defined methodology guides each engagement

LINE OF BUSINESS FOCUS

We choose to be deep, not broad. Rather than consult on a myriad of topics, we focus on select line of business solutions that create the greatest value and ROI for your business:

- Customer Relationship Management (CRM)
- Business Analytics
- Human Capital Management (HCM)
- Supplier Relationship Management (SRM)
- Cloud Computing and Virtualization

In each of these areas, we draw on a wealth of real-world, subject-matter expertise. Our senior advisors have a combined fifty-plus years of experience implementing enterprise-scale business solutions at some of the world's largest companies.

CONSULTING SCENARIOS

Our goal in every project is to help IT leadership create a specific plan for rapid delivery of value. Consider us for initiatives like these:

- **License Optimization**

Improve your total cost of ownership for SAP enterprise applications. Our experts can review existing license commitments and help you assess and optimize your spend. We'll also review internal shelf-ware and establish a clear plan for deployment, including the elimination of redundant or unnecessary point solutions.

- **Cloud Development**

Migrate your SAP Sandbox, Development, and/or Test Platforms to Virtualization and/or Private and Public Cloud technologies. We can help you reduce your costs of deploying and provisioning systems and increase your budget percentage spend to other valuable initiatives.

- **Solution Enhancement**

Our experts will create project implementation plans that accelerate the usability of advanced SAP functionalities like CRM 7.0 and BusinessObjects 4.0. We'll also recommend simple usability enhancements, including dashboards and mobility options, that can increase user adoption of your chosen solution.

CLIENT SUCCESS: CLOUD ROI DELIVERED

RunE2E Advisory Services experts helped the Canadian division of a major DIY chain rapidly implement SAP CRM in a hosted, private cloud.

The result? An accelerated launch (measured in weeks, not months) and reduced cost compared to a traditional on-premise solution.

Let's get started.

Whether you seek new solutions or a plan for optimizing existing investments, RunE2E Advisory Services can help. Call us today at (866) 457-2193 to schedule a no obligation phone assessment with a RunE2E Solution Advisor.
